APPARATUS FOR SUPPORTING AUTOMOTIVE TIRES

ABSTRACT OF THE DISCLOSURE

An apparatus for supporting automotive tires is provided having a hanger pin adapted to fit through the mount hole of a vehicle wheel. The apparatus is intended to be installed on an automotive hoist at a height approximately the same as that of a tire of a vehicle disposed on the hoist. A worker removing a wheel from the vehicle disposed on the hoist can thus hang the wheel on the apparatus without significantly bending at the waist.
